Fujinon's new SUPER 80 is brighter and lighter.

With its 80mm objective lens, Fujinon's SUPER 80 inherently gathers more light for brighter images. Normally, that advantage means extra weight. But at 1.3kg, the SUPER 80 *weighs the same or less than many scopes with smaller objective lenses.* Other advantages include waterproof scope construction, high resolution, computer designed optics, Fujinon's patented EBC coating for the highest light transmission, convenient center focus control, and the standard flat-field distortion-free 20~60X zoom eyepiece. Optional flat-field eyepieces include the wide angle (2.1° FOV) 25X with 31mm eye relief (the world's longest), 30X, 50X and 80X. For the ultimate in color accuracy, clarity and resolution, choose the SUPER ED 80 with extra low dispersion fluorite glass. Naturally, a lifetime warranty against manufacturing or material defects comes with every SUPER 80. For more information, please contact:

WE INVITE YOU

INTO OUR SPECIAL CIRCLE OF FRIENDS

The Wildlife Conservation Society has established the Wildlife Heritage Circle to recognize and thank generous Society members and friends who make a planned gift. We invite you to become a charter member of this very special group. Create a life-income arrangement with the Society or include the Society in your will, estate plans, or as beneficiary of life insurance plans. If you have already made these arrangements, please let us know so we can extend to you the privileges of membership.

FOR MORE INFORMATION ON PLANNED GIFTS, PLEASE CALL MICHELLE MARGAN OR LISA SACEWICZ OF THE OFFICE OF PLANNED GIVING AT THE BRONX ZOO AT 800-747-0740 OR 718-220-5090.
